

2016 SUN-n-FUN Forum

Learn how to improve your chances of survival, enhance your piloting techniques and increase your confidence when encountering marginal or deteriorating weather conditions. Whether flying “VFR on Top”, over mountainous terrain or water environments at night; what “IFR tools” and techniques do seasoned pilots employ to fly safely when more challenging atmospheric conditions persist. This interactive briefing is beneficial for students and any pilot skill level.

Directions: CFAA-8

A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!
